

SHOWCASE

Cube Chandelier - Zwolle, The Netherlands

Known for their ability to flawlessly integrate lighting into architectural projects, system integrator, installer and programmer Maramoja Projects was commissioned to create a simple yet stunning chandelier for Hotel Lumen's grand lobby in Zwolle, The Netherlands. Their stunning creation, a futuristic Cube Chandelier, exceeded all expectations, transforming the space into a glowing, surreal atmosphere. With the assistance of Traxon's 1PXL Board RGB and an e:cue Butler, the cubes are illuminated from the inside displaying a rich, even distribution of colored light capable of virtually any hue, determined by the programmer. Due to its low-profile, lightweight nature, 1PXL Board RGB is the ideal solution for this type of installation, as it provides bright light output with discreet installation so the fixture cannot be seen. The Cube Chandelier can be recreated due to its scalability and modularity, as well as the ease of installation of Traxon 1PXL Board RGB, and the ability to pre-program e:cue's Butler for uninterrupted replay of the 30-minute lighting show.
