

# SHOWCASE

Binary Sculpture of Manyata Embassy Business Park - Bangalore, India

Visitors are welcomed with an inspiring Binary Sculpture upon arriving Manyata Embassy Business Park (MEBP) near Nagavara Lake in North Bangalore. Home to a vibrant mix of businesses from dynamic startups to global brands, MEBP is one of the largest technology and business parks in India. Created by DPA Lighting Design, the Binary Sculpture is a 4-meter cube structure made of steel with “0” and “1” cut-outs symbolizing the binary numeral system in mathematics and digital electronics. Traxon Dot-XL6 RGB, e:cue Butler S2 and Butler XT2 are installed on the Binary Sculpture to enable colorful illuminations and stunning lighting effects. Different lighting programs such as scrolling text of “MEBP”, shimmering effects, rainbow color chasing, arrow effects and much more are set up to be easily controlled and replayed via the e:cue user terminal Glass Touch T12. MEBP has been awarded the “Best IT Park” at the 2013 NDTV Property Awards in India. Often referred as the „Silicon Valley of India“, the innovative Binary Sculpture with dynamic lighting effects beautifully underlines Bangalore as one of the leading roles in information technology globally.
