

SHOWCASE

Maywood Medical - Maywood, NJ, USA

Maywood Medical, a new state-of-the-art outpatient surgical center, is a refreshing departure from traditional healthcare facilities. Located in a high-traffic area, the client wanted to draw attention to the facility and highlight the glass two-story atrium of the ultra-modern building. Installed along the perimeter of the atrium at floor level and concealed by a short wall, as well as in an alcove above the elevator door, Traxon Graze Shield AC XB RGB with a 50°x10° optic evenly grazes the 20-foot walls. An e:cue Butler XT2 controls the installation, slowly cycling between colors over the course of six minutes, with two pre-programmed shows – one for daytime and one for nighttime. The dynamic LED lighting program runs 24/7 and is designed to be completely hands-free, however an e:cue Glass Touch T12 allows for manual override if needed. The result is a vibrant and colorful focal point that aligns with the modern style of the new building.

FEATURED PRODUCT

Graze Shield AC XB RGB

METHOD OF CONTROL

Butler XT2

Glass Touch T12

PROJECT DETAILS

Category: Architectural, Hospitality, Healthcare
Location: Maywood, NJ, USA
Client: Vanguard Surgical Center
