# Quick Ship Guide

2016

# introduction

The Quick Ship program from Traxon Technologies and e:cue lighting control provides a targeted selection of high-demand solutions without made-to-order lead times. With fast access to a wide range of products, there's an option for every application.

**New and Improved Quick Ship - Shortened Lead Times, Expanded Product Line**  
Traxon's Quick Ship products will now be shipped within three (3) business days of order placement; it's ideal for short-lead opportunities looking for the best quality in LED fixtures and control. Specifiers and other clients can build out their projects from our Illumination, Ambiance and Accent, and User Terminal families, and expect the same high level of performance, service, and quality with a faster turnaround.

# rules

The catalogued products shown on the enclosed pages represent the options that qualify for the Quick Ship program. Simply complete an order using any of the options in this brochure, and your order will qualify for Quick Ship processing. This guide contains ordering codes only, so please refer to the individual product cutsheets at [www.traxontechnologies.com](http://www.traxontechnologies.com), for further product details.

All qualifying products will be processed as Quick Ship unless otherwise indicated on the order. If an order must ship complete, please clearly state "SHIP COMPLETE" when placing the order. Orders marked Ship Complete may not qualify for Quick Ship terms.

Quick Ship qualifying order will ship within three (3) business days. This does not include weekends or holidays. Lead time starts when Traxon confirms receipt of the purchase order.

Consult factory for options not shown in this guide. Major projects with large quantities may not apply for Quick Ship lead times. This includes projects requiring significant Project Management attention and/or drawings.

Partial shipments may be required. Change orders will affect lead time.
