

# SHOWCASE

Club Jet - Las Vegas, USA

The Club Jet is the latest and most sought after night spot of the Mirage Hotel and Casino in Las Vegas, USA.

In order to underline the club's uniqueness Traxon created a package, whereby the system was customized specifically for the club's needs. Traxon installed 120 of its multifunctional Tile 64PXL Panels Matrix in an exceptional checkerboard fashion at the club's ceiling, right above the dance floor.

Composed of 64 clearly separated and individually addressable pixels, the panel allows for fascinating plays of various colors and picturing of clearly defined shapes, moving text as well as video animations.

The system controls over 23,000 DMX channels.
