

SHOWCASE

Botanic Inn – Northern Ireland

The Botanic Inn is Northern Ireland's No 1 sports and live entertainment bar. With three separate bars it offers live big screen sport, live music and an enticing restaurant atmosphere.

To highlight the bar's versatility, Traxon provided its multifunctional Tile 64PXL Matrix panels, which are installed near the performance scene where additional Board 16 SMD RGB modules embellish the wall. Another bar area features DMX-controlled Tile XB panels in the floor, giving the Botanic Inn's visitors a special thrill upon entering. DMX technology enables the venue to create spectacular lighting scenarios to enhance any event.
