

SHOWCASE

Sekisui House - Sapporo, Japan

Sapporo, Japan's 5th biggest city and renowned as one of the most famous and popular winter sport venues throughout Asia, recently celebrated the grand opening of Sekisui House in Central Sapporo. The Prime Mansion is located right next to the famous Odori Park, where further city landmarks, national monuments and the public TV Tower are situated. For the grand opening, an extraordinary light installation was set up, marking the city's skyline. Using state-of-the-art outdoor LED technology, Traxon has equipped the mansion's façade with 70 Liner XB, bathing the building in stunning colorful light. Installed along the outer façade, the highly customizable lighting fixtures guarantee an even light output due to their high brightness quality LEDs. Individually controllable using Traxon's innovative LED Engine XB, the Liner XB enables sophisticated lighting scenarios with easy color settings and change of ambiances. The seamless integration of the light installation in the surrounding cityscape renders Sekisui House one of the attractions of Sapporo.
