

SHOWCASE

Glitter Glutch - USA

A curved wall in the entrance area of Glitter Glutch, an entertainment venue in Las Vegas, was illuminated using Traxon's Cove Light 12 SMD RGB fixtures. The powerful lighting installation, which is controlled by Traxon Light Management System, is programmed to display a range of brilliant colors illuminating the entire club. The centerpiece of Glitter Glutch - its bar - was equipped with Cove Light 12 SMD RGB at its lower part. The lighting fixtures add the final touch to the venue and illuminate the night club dynamically.

FEATURED PRODUCT

Cove Light 12 SMD RGB
MO-CL-52701

METHOD OF CONTROL

Butler
LM-CS-50041
