

SHOWCASE

Levi Auditorium - Levi, Finland

Rooted in the nature of Lapland, the Levi Summit Conference and Exhibition Center offers a unique setting for meetings and conferences. Multipurpose facilities make the Levi Summit a first class venue for diverse events from small, private occasions to big conferences. Not only because of it's innovative, reliable products but also because of it's flexibility in meeting ambitious customer demands, Levi Summit chose Traxon Technologies to create an exclusive, inviting atmosphere throughout their 470 square meters sized auditorium. Traxon was tasked to find a lighting solution, which offers high adaptability to guarantee that it is suitable for various kinds of events. The installation of 40 Liner XB fixtures illuminates the area with a multitude of saturate colors, dynamic color changing effects as well as static looks. Control is provided by a Micro Server, offering a powerful but easy to use solution for small to complex control scenarios. Traxon has managed to turn a functional auditorium into a stimulating, memorable space that has become a great conversation piece for those who enter the hall.
